Powersport Theft Recovery Systems

## Our Award-Winning GPS-enabled Theft Recovery System is now available for all powersport vehicles!

**Powersport vehicle thieves strike every 10 minutes. Give your customers the upper hand against thieves by insisting on GPS Xtreme!**

**Introducing the new GPS Xtreme – because nothing is more important when it comes to stolen vehicle recovery.**

For the first time ever, the #1 Stolen Vehicle Recovery system for autos is available for all powersport vehicles! Thieves don't stand a chance against the GPS Xtreme from Guidepoint Systems. Combining the pin-point precision of GPS location technology, plus the reach and reliability of the nationwide wireless network with a 24/7 team of recovery experts, GPS Xtreme is by far the most reliable theft recovery device available for powersport vehicles today.

### **Always prepared.**

What good is a stolen vehicle recovery system that isn't ready when a thief strikes? Exposure to the elements and dead batteries can render an otherwise adequate system worthless. That's why the new GPS Xtreme packs an impressive feature set that ensures it's always prepared:

### **Enhanced Water-Resistance**

GPS Xtreme is IP67 rated, so it can be submerged into more than 3 feet of water for up to 30 minutes.

### **Dust-Proof**

The GPS Xtreme is protected by an impenetrable casing that prevents even the smallest dust particles from entering its sensitive electronic components.

### **Advanced Power Management**

GPS Xtreme owners will never have to worry about encountering dead batteries caused by their units. That's because the GPS Xtreme packs an impressive rechargeable internal backup battery and unique three-stage power management system designed to prevent undue strain on the vehicle's battery.

### **Omni-Directional Motion Sensor**

The GPS Xtreme uses an intelligent omni-directional motion sensor designed to detect the slightest movement of the vehicle when not in use. The sensor is an integral part of the power management system, restoring the Xtreme to full-power mode when it senses suspicious movement.

### **Xtreme protection against the risks of theft.**

A GPS Xtreme protected powersport vehicle is always prepared for the worst. And if the vehicle is ever stolen, its owner can rest assured the vehicle will be located and returned faster than ever, thanks to Guidepoint Systems Real-Time GPS Tracking.

### **Real-Time GPS Tracking**

If a vehicle goes missing, one call to **877-GPS-FIND** is all it takes. The Guidepoint Response Center will quickly locate the vehicle anywhere throughout North America. Then, they'll work with law enforcement to ensure the vehicle's expedient return, often in less than two hours.

### **Upgraded Service For Extra Protection**

All GPS Xtreme owners have access to optional features that provide an extra level of protection against thieves and unwanted use. Early Theft Notification, Security Fence Alerts and Online Vehicle Tracking help owners know the whereabouts of their vehicle when it's out of their hands.

Plus, with additional features like Roadside Assistance, Navigation Assistance and a robust Extended Warranty, Guidepoint Systems offers powersport vehicle owners complete peace of mind.

**Don't let your customers become victims. Give them the best theft recovery system available. Give them GPS Xtreme!**
